

FH-SERIES R™

Multispectral Fixed Camera for Early Fire Detection

The FLIR FH-Series R are ruggedized, multispectral fixed cameras that integrate industry-leading thermal imaging with 4K visible imaging to provide rapid visual verification of hot spots in early fire detection applications. When a hot spot or temperature change is detected, the contactless temperature measurement is sent to the operator through a connected Video Management System (VMS) for instantaneous assessment and deployment of response tactics. Custom scheduling provides security personnel the flexibility to enable and disable alarms depending on business hours and seasonality. Combining the power of thermal hot-spot detection with intelligent vehicle detection, false alarms from hot exhaust pipes can be dramatically reduced.

RAPID DETECTION AND VISUAL VERIFICATION

Integrates a high-resolution thermal and visible sensor for hot-spot detection and visual verification from a single device

- Detect hot spots instantly with FH-Series R camera models that feature up to 640 × 512 thermal resolution and <35 mK thermal sensitivity
- See smoke and immediately verify threats with the 4K visible camera
- Combines a two-camera installation in one physical connection for a cost-efficient solution
- 10-year thermal sensor warranty

INTELLIGENT ALARMS

Detect hot spots and intruders with one camera

- Detect threats from intruders as well as hot spots with on-board video analytics
- Eliminate false temperature alarms from hot exhaust pipes with 'vehicle exclusion mode'
- Make detections based on time of day, business hours, and seasonality with the on-board scheduling tool, which allows the operator to select either visible or thermal analytics

EASY INTEGRATION

Deploy the FH-Series R as part of a Teledyne FLIR end-to-end solution or in combination with preferred third-party solutions

- Strengthen end-to-end systems with on-board NEXUS® technology, which enables network connections to FLIR edge devices
- Tightly integrated with FLIR United VMS and major third-party VMS
- ONVIF® Conformant S/G/T profiles
- Receive radiometric alarms through compatible VMS platforms
