01 Selection

The Retail Sales Associate can select up to six (6) mattresses in your store to try out and compare for a single customer or a couple.

02 Imaging

The system takes measurements of the customers' unique body attributes. It displays them with peak pressure points to showcase the mattress' support.

03 Results

Review the final results with your customer so they can select the right mattress that provides both comfort and support, leaving them feeling confident about their selection.
